Overview:

The 2030 Agenda for Sustainable Development, adopted by all United Nations Member States in 2015, provides a shared blueprint for peace and prosperity for people and the planet, now and into the future. At its heart are the 17 Sustainable Development Goals (SDGs), which are an urgent call for action by all countries - developed and developing - in a global partnership. They recognize that ending poverty and other deprivations must go hand-in-hand with strategies that improve health and education, reduce inequality, and spur economic growth – all while tackling climate change and working to preserve our oceans and forests.

Problem Statement:

Using Tableau, we want to create a storyboard that showcases the current state of affairs for our Sustainable Goals. Participants can choose One or More Goals to weave a story. You will be judged on the following –

1. Interpretation of the UN SDG(s)
2. Quality of the visuals to showcase your understanding
3. Quality of the storyboard and the narrative

Dataset: Download the applicable data from https://unstats.un.org/sdgs/dataportal/database

1. Goto https://unstats.un.org/sdgs/dataportal/database
2. Click on "Select +" under Data Series and select the Goal for which you want to download the data
3. Select the Geographic Areas as "Countries". Use the toggle button to make the selection
4. Select "Years" on Period
5. Click on the "Show Results" to see the results.
6. You can also find the MetaData, in the results below by clicking on the "Go to Metadata" button, to gain more understanding of the attributes

All the best!
